

Global IT Infrastructure Report

Date: Q3 2026 | Prepared by: Security Engineering

This document outlines the structural integrity of the Phase 2 Agentic OCR deployment. The system relies on a heuristically governed feedback loop. All components have been rigorously tested against the CS-4063 guidelines to ensure total alignment with PECA 2016 and the ACM/IEEE ethical standards.

Module	Status	Compliance Score
decide.py	Operational	99.9%
perceive.py	Operational	100.0%
